Bayer CropScience

Introducing... **MODESTO**

Broadest pest spectrum

- Improved Cabbage Stem Flea Beetle protection
- Useful control of Turnip Sawfly larvae
- Very effective against autumn aphids
- Associated reduction in Turnip Yellows Virus
- Decreased root damage by Cabbage Root Fly

Product Profile

- Contains clothianidin and beta-cyfluthrin
- 5g/kg clothianidin vs. 2g/kg imidacloprid in Chinook
- Safe on all varieties of Winter Oilseed rape
- Treated seed may be stored for up to 18 months
- First subsequent foliar spray should be made with a non-neonicotinoid insecticide (e.g. pyrethroid)
