

# DUPLO

## Hybrid Oilseed Rape

High Oil Content

A Triple Layered PNN Variety

RLM7+ Disease Resistance

Turnip Yellow Virus Resistance

Superior Primary Response

Pod Shatter Resistance

N-Efficiency

**Status:** AHDB Candidate List 2021/22 + DSV UK Int. trials

DUPLO stands out from the crowd combining outstanding disease protection with top yields. It was the first DSV variety to launch with improved N-Efficiency, bred to ensure growers get the highest possible response to Nitrogen fertilisers so every kg applied works as hard as possible to produce yield with minimum waste. DUPLO has performed well all across Europe and the whole of the UK in all conditions, proving it is a very robust variety.

DUPLO is our breeders pick for growing in all conditions, features of particular note are its outstanding autumn vigour and DSV triple-layer protection of Turnip Yellow Virus (TuYV) resistance, pod shatter resistance, and RLM 7+ multigene resistance to phoma stem canker. DUPLO offers a unique three-way disease protection and thus stability of accompanying yields.

DUPLO performed exceptionally well in DSV's new non-inversion tillage trials which include no till. This proves that plants are optimised for strong establishment, exceptional performance and consistent gross output delivery in reduced cultivation systems.

Developed as a direct result of the Neonicotinoid ban and the need to move towards less intensive and more environmentally friendly production methods, DSV Triple Layered oilseed rape takes as much of the guesswork out of growing the crop as possible.

<b>Gross Output</b>	109% (E/W)
<b>Seed Yield</b>	107%
<b>Oil Content</b>	46.8%
<b>Winter Hardiness</b>	High
<b>Autumn Vigour</b>	High
<b>Spring Vigour</b>	High
<b>Plant Height</b>	146cm
<b>Flowering</b>	5
<b>Maturity</b>	6
<b>Lodging</b>	8
<b>Stem Stiffness</b>	8
<b>Light Leaf Spot</b>	5
<b>Stem Canker</b>	9
<b>TuYV Resistance</b>	R
<b>Pod Shatter</b>	R
