

LIKEiT

Maize

Maturity Class: FAO 190

LIKEiT is a high yielding variety with excellent standing power and high disease resistance, offering all things to all growers. With a bold plant and fully enclosed cob, LIKEiT is a dependable heavy yielder for every site and hits the mark as a tri-purpose variety.

Listed for Favourable sites from the NIAB/BSPB data, LIKEiT offers high dry matter yields (18.1t/ha) and is suitable for forage, AD and grain. Although the variety has a relatively tall growth habit, it develops a well-formed cob that ensures high starch content (31.7%).

LIKEiT prefers cooler climates, which makes it suitable for a wide range of sites. It has rapid early vigour (7.6) with huge potential as an early maturing variety. What is more, with a strong disease package that offers tolerance to fusarium and eyespot as well a strong score for lodging (8), growers have an ideal all-round performer.

“Over the last 3 years LIKEiT has consistently proven to be a very versatile and robust hybrid maize variety exhibiting excellent all round, agronomic, quality and yield characteristics in all farm situations, most notably on varying sites with a range of soil conditions. The excellent standing power and disease tolerance, including eyespot and fusarium has combined with an impressively large, fully-enclosed cob making LIKEiT a firm favourite with all our growers.”

Mark Davies, Green Farm Seeds Ltd., Newent, Gloucestershire.

Site Type	Favourable
Forage	Yes
AD	Yes
Grain	Yes
FAO	190
Dry matter content at harvest (%)	31.9
Dry matter yield (t/ha)	18.1
Dry matter yield (% of 4 and 5 year varieties)	101
ME of fresh plant at harvest (MJ/kg dry matter)	11.55
ME yield of fresh plant at harvest (1000s MJ/ha)	209
Starch content of whole plant at harvest (%)	31.7
Starch yield of whole plant at harvest (t/ha)	5.73
Cell wall digestibility (%)	58.3
Early Vigour	7.6
Standing power at harvest (root lodging) (1–9)	8.0
Leaf senescence (1–9)	6.7
Eyespot rating (1–9)	4.7
