

# Temptation

## Hybrid Oilseed Rape

Turnip Yellow  
Virus Resistance

A PNN Variety

Superior Primary  
Response

Suitable for  
Min-Till or No-Till

## Overview

### Status: AHDB Recommended List 2019/20

**Temptation joined the Recommended List this December. It has been Recommended for the whole of the UK. It is the first Turnip Yellow resistant variety to be sold by DSV in the UK.**

Turnip Yellow Virus (TuYV) has been a well-known threat to oilseed rape for over 30 years throughout Europe. This disease can cause a considerable loss of yield. Spread by the peach potato aphid (*Myzus persicae*) indications are that losses can be as high as 20%. Due to this, DSV have been breeding varieties with resistance to TuYV for over 10 years. It has become more of a concern throughout Europe, including the UK, due to the reduction in availability and restrictions in the use of key plant protection products.

**Temptation** has been recommended for the whole of the UK with a strong gross output scores for the East and West and North region. It is a restored hybrid with a gross output comparable to listed varieties and is a considerable leap forward from first generation turnip yellow resistant varieties.

**Temptation** demonstrates a high and consistent yield and an impressive oil content of 46%. **Temptation** was the third highest yielding variety in the 2018 with a score of 105.7% in AHDB Harvest Results.

**Temptation** has strong winter hardiness reducing the impact of late frosts and snow cover. It's aggressive vigour is very noticeable in official and on farm trials. Independent results this year suggest the variety has strong tolerance to Verticillium Wilt.

It has good field disease resistance and has proven to be robust in UK conditions, with a light leaf spot score of 6 and a phoma stem canker score of 5. A high performance variety with low input management!

## UK Data for Temptation

Gross Output	101% (UK) 102% (EW) 98% (N)
Seed Yield	101% (UK) 101% (EW) 98% (N)
Oil Content	46%
Autumn Vigour	High
Spring Vigour	—
Winter Hardiness	High
Plant Height	153cm
Earliness of Flowering	6
Maturity	5
Lodging	8
Stem Stiffness	7
Light Leaf Spot	6
Stem Canker	5
Verticillium Wilt Tolerance	High
