

# LIFLEX

TRIFOLIUM REPENS

## Profile

LIFLEX scores with a very good sward density and a good health. As first variety in Germany it achieves the classification in the early maturity group „three” and therefore it differs from all listed varieties. LIFLEX shows a medium leaf size and a low content of hydrocyanic acid. Its dry matter yield especially in the first cut is worth mentioning and thus LIFLEX is very suitable for grazing.

**National listing/Official recommendation:**

BY, CO, DE, DK, NL, NO, RU, TR, UA, UK

**Sowing rate:** 10-12 kg/ha

- ✓ medium leaf size
- ✓ earliest white clover variety
- ✓ high yield and sward density
