

LITEMBER

Mustard (*Sinapis alba*)

■ Late all-rounder

The mustard variety LITEMBER tolerates late sowing and offers high organic matter production. LITEMBER is fast-growing, late-flowering and resistant to drought conditions when young. This variety improves soil structure with its distinctively developed root system.

■ Cultivation instructions

| | |
|---------------------------------|--|
| Sowing rate | 18-20 kg/ha |
| Sowing date | late July to mid September |
| Usage | green manure, grazing |
| Specific characteristics | fast coverage, late sowing, mulch drilling |
